DEVELOPING PROJECTS IN FRONTIER MARKETS

Working with World Bank Group: Myanmar Myingyan Project Case Study

Creating Markets, Creating Opportunities

Myingyan Project Background

- WBG and other Development Partners Re-engaged in Myanmar after 25 years of Absence
 - Myanmar began a triple transition to a democratic government, market-oriented economy, and peace in border areas (2010)
- Myanmar's Power Sector Quickly Emerged as a Key Development Priority
 - In 2012, about 75% of the population had no access to grid electricity (GDP per Capita of US\$1,105)
 - Electricity consumption was about kWh per capita: among the lowest in the world
 - Only 3,500MW of installed generation capacity
 - 67% from hydro which resources reduce significantly during summer when demand peaks
 - 700MW (20%) from gas-fired inefficient single-cycle power plants
 - Off-grid schemes: rare, typically expensive, and unreliable
 - WBG management began engaging with Myanmar's energy sector to introduce competitive private sector participation
- Development Impact of Myingyan Project
 - Increase the country's available gas generation capacity by about 50%
 - Adoption of IFC and MIGA performance standards will mitigate E&S risks and set a high standard for future projects
 - Lead to further private sector IPP projects by creating a bankable environment

Change Takes Time

Private Sector Concerns in Myingyan Project

Private Sector Concerns

Nascent local financial sector could not finance the project

Foreign financiers required risk mitigations and project guarantees

Rapidly changing legislative regime and precarious position related to foreign currency reserves

3

WBG Mitigation

IFC provided a 20-year loan of US\$57 mn (of which US\$20 mn flows from AIIB) ADB and off-shore commercial lenders provided the remaining debt

WBG and other DFI partners offered a menu of risk mitigation products, including MIGA's political risk instruments and World Bank's partial risk guarantees

MIGA provided "Four-point Cover"

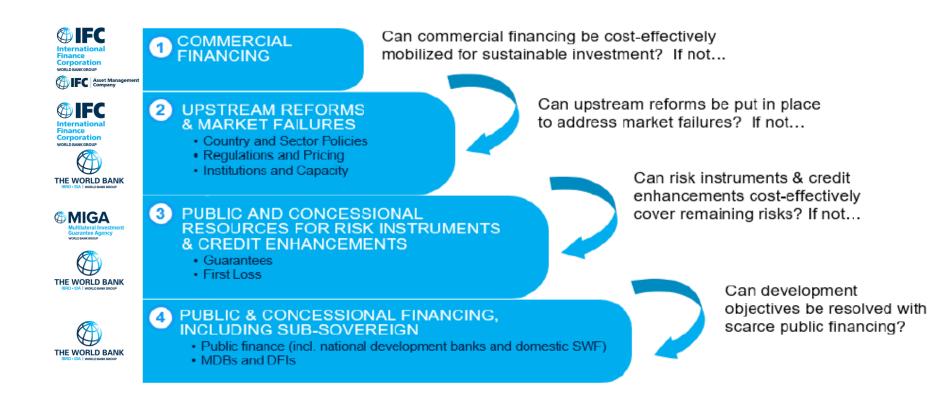

Key Takeaways

- For PPPs, engage early and at a high level with governments and multilaterals
 - Korean developers and EPC players have good track record and RFP submissions, but fall short on relationship building
- Be patient in securing PPPs and EPC contracts
- Select local partners with integrity but without the political baggage
- Understand the tools / strengths / weaknesses of multilaterals and financing banks
 - Test private sector appetite early
- Structure the transaction with a long-term perspective

WBG's Maximizing Finance for Development – the Cascade Approach

IFC's Synergies within the World Bank Group – IDA Private Sector Window (PSW)

IDA Private Sector Window의 신설을 통해 최빈국 및 분쟁국 (IDA and FCS 국가)의 근본적인 민간투자 제약사항을 해소하기 위해 적극적으로 노력하고 있습니다

| IDA PSW | US\$2.5 bn PSW to address fundamental constraints on private investments in IDA and FCS countries Expected to catalyze between US\$6 – 8 bn in private investments Four facilities are designed to target critical challenges identified by IFC's and MIGA's private sector counterparts |
|-----------------------------|--|
| Risk Mitigation Facility | Provides project-based guarantees without sovereign indemnity to help crowd in Private Participation in Infrastructure (PPI) in countries where governments have constrained fiscal space and institutional capacity |
| MIGA Guarante Facility | Provides insurance capacity to cover non-commercial risks such as war, civil disturbance, expropriation, currency in-convertibility or transfer restriction |
| Local Currency Facility | Supports provision of long-term local currency investments for high-impact projects in countries where market solutions are not sufficiently available and local currency sourcing is limited due to volatile or underdeveloped financial markets |
| Blended Financ Facility | Provides blended finance for pioneering high-impact investment in priority areas (SME, agribusiness, manufacturing, health and education, energy, telecommunications and climate finance) in countries where the investment climate is weak |

List of FCS Countries

| Country | Population | GDP per Capita (US\$) |
|----------------------|------------|--------------------------|
| Afghanistan | 34.7 mn | 584.0 |
| Burundi | 10.5 mn | 303.7 |
| Central African Rep. | 4.6 mn | 348.4 |
| Chad | 14.5 mn | 777.2 |
| Comoros | 0.8 mn | 727.6 |
| Congo, Dem. Rep. | 78.7 mn | 474.9 |
| Congo, Rep. | 5.1 mn | 1,721.1 |
| Cote d'Ivoire | 23.7 mn | 1,420.6 |
| Djibouti | 0.9 mn | 1,862.2 |
| Eritrea | 4.5 mn | N/A |
| Gambia, The | 2.0 mn | 474.7 |
| Guinea-Bissau | 1.8 mn | 596.9 |
| Haiti | 10.8 mn | 814.5 |
| Kiribati | 0.1 mn | 1,424.5 |
| Kosovo | 1.8 mn | 3,574.5 |
| Liberia | 4.6 mn | 452.0 |
| Mali | 18.0 mn | 729.7 |
| Marshall Islands | 53,066 | 3,385.9 |

Note: Population and GDP per Capita as of 2016; PNG GDP per Capita as of 2015 Source: World Bank DataBank

7

| Country | Population | GDP per Capita (US\$) |
|--------------------|------------|--------------------------|
| Micronesia | 0.1 mn | 3,016.0 |
| Mozambique | 28.8 mn | 528.3 |
| Myanmar | 52.9 mn | 1,194.6 |
| Papua New Guinea | 8.1 mn | 2,182.7* |
| Sierra Leone | 7.4 mn | 587.5 |
| Solomon Islands | 599,419 | 1,922.0 |
| Somalia | 14.3 mn | 426.0 |
| South Sudan | 12.2 mn | 758.7 |
| Sudan | 39.6 mn | 2,513.9 |
| Syria | 18.4 mn | N/A |
| Тодо | 7.6 mn | 551.1 |
| Tuvalu | 11,097 | 2,970.0 |
| Yemen, Rep. | 27.6 mn | 1,401.9 |
| West Bank and Gaza | 4.6 mn | 2,865.8 |
| Zimbabwe | 16.2 mn | 1,018.7 |
| Iraq | 37.2 mn | 4,974.0 |
| Lebanon | 6.0 mn | 8,046.6 |
